

SOP: Stage 2 SEO Using Scribbles (Helium10 Listing Optimizer)

There are 3 Phases of Keyword Optimization

1. **Product launch SEO:** Reverse engineering competitor listings and adopting the best practices.

2. **Pink word update SEO:** do at month 3 for mature listings.

3. **Advanced Strike Distance SEO** - do at month 6 for mature listings that index for 800+ Organic keywords Distribution

Objective: To use the Scribbles Listing Optimizer to detect and eliminate repeat keywords on Search Terms.

1. Download Category Listings Report

The first thing to do is to determine which SKUs need Phase 1 or Phase 2. Do this by downloading the Category Listings Report

Hover your mouse over the Inventory Tab > Inventory Reports

If the Category Listings Report is not available in the drop-down tab you can contact Seller Support and ask them to enable your Category Listings Report. You can either send a case, or call Amazon directly. Click this <u>YouTube video</u> on how to request Amazon to enable the Category Listings Report.

Click Request Report, wait for the file to get exported, and choose Download.

After downloading your Category Listings Report, you are now ready to prepare your sheet and start Auditing.

2. Audit Search Terms

Create your sheet by adding a Google Sheet inside the Client Folder. Name the Sheet accordingly so that it's easy to recognize.

Go to the Clients Folder and find the name of the client.

olders					Name
1934 BBQ	Abiie/eBrig!	Abington Lane	ADIYOGI NUTRITION	Advanced Supply (Humor U	Alen Corp
Amanda Panda	American Comhole Associ	AmzMarketSquare	Andrew Easton (Vent, IBS, T	Arc Integrated	Arc Integrated

After all the information you need has already been transferred to your spreadsheet (just as shown below), make sure you fill in the missing cells the best way you can.

Tip: You may sort this alphabetically by Titles or by Search Terms. Similar or like-products typically have the same search terms. If you identify that multiple products use the same sets of keywords for Search Terms (i.e. Parentage/Variation Family), you may simply copy and paste the same Search Terms on all similar products.

Exception: If the POC/Manager says to utilize the real estate of the variation tree, you may need to use different Search Terms for all child ASINS even if they are under one parent ASIN.

Go through the list of Keywords and click them one by one. Anything that has more than one term needs to be removed from the "Search Terms" box.

Working with the Scribbles Keyword List:

- 1. Click each keyword on the keyword list
- 2. If a keyword is highlighted on the Search Terms Box, delete it.
- 3. Repeat until your click all keywords with 2 or more frequencies.
- 4. Note: Search Terms are about adding misspelled keywords and Spanish Terms.

After going through the list of keywords and ensuring that there are no more duplicates on the Search Terms box, you can start adding your misspelled words and add a few Spanish translations of the keywords on the keyword Box. Just as the image is shown below.

Continue to do this until you reach 249 Characters.

To make sure that all your new keywords are not used more than once, copy them again and paste them on the keyword Box.
